NEW SAT - March 2016

A new version of the SAT came out in March 2016 which has caused a change in how the scoring is processed. The Sliding Scale key that you will find online is NOT the correct one to use when determining sliding scale off of a SAT score. You must use the SAT Concordance chart to see how the “new” score translates to the “old” scoring rubric.

SAT CONCORDANCE

The SAT redesigned its test, which means the scores on the redesigned (new) test are different than the scores on the old test. If you took the SAT in March 2016 or after, you took the new SAT.

To determine what core GPA you need to meet NCAA Division I or Division II requirements, you need to use this College Board Concordance Table to convert your new SAT score.

Step One: Find your new SAT score on the College Board Concordance Table below. Then, look at what your score converts to on the old SAT.

Step Two: Take that converted (old) score and look at the Division I or Division II sliding scales to determine what core GPA you need to meet NCAA initial-eligibility requirements.
